Specialties

HTML/XHTML, HTML5, JavaScript, CSS, Facebook Graph API and Facebook SDKs, Javascript PHP, SQL (MS SQL Server, MySQL, PostgreSQL), jQuery, MooTools, Code Igniter, Wordpress, Third party APIs (Twitter, Pinterest, etc.), CVS, SVN, Git.

Technical Skills

- Senior Web Developer with advanced expertise in both client side and server side development.
- Experienced designing and building complex web based applications.
- Interface with third party APIs and systems.
- Develop clean, efficient, pixel perfect, standards compliant user interfaces from design comps using semantic, easily readable HTML and CSS. Provide client side scripting using Javascript and Javascript libraries.
- Develop efficient, scaleable web applications on the LAMP stack using object oriented PHP. Specializing in MVC frameworks.
- Strong experience designing and building custom web software and enterprise level software on both large and small teams in an agency environment.

Team Skills

- Excellent written and verbal communication skills. Skilled at project planning and communication including requirements gathering, documentation, scheduling and personnel/resource management.
- Strong organizational skills. Able to establish a schedule and meet both individual and team deadlines. Design, plan and implement complete, feature rich, custom, customer defined, web based applications.
- Able to manage software lifecycle including source/version control, issue tracking, change control, risk analysis, requirements gathering, resource assessment, deployment and maintenance of customer applications.
- Experience managing local and decentralized cross functional project teams.
- Experience managing and collaborating with off-shore vendors and development teams.

Experience

FB Productions, LLC

Technical Director - 1/2008 - Present

Technologies: PHP, MySQL, XHTML, HTML5, CSS, Apache, Linux, jQuery, Moo Tools, MVC frameworks (CodeIgniter, CakePHP, Zend Framework) CMSs (Drupal, EE, etc), Wordpress, CRMs (SalesForce, Sugar, etc.), Third party APIs (Open Graph, Twitter, etc.), Version control (SVN, Git)

Manage day to day operation of development team(s) across multiple projects in an agency environment. Develop efficient, modern web software that meets customer requirements. Meet with customers to discover project requirements and design a solution according to customer needs. Deploy, maintain and upgrade/modify/customize customer applications.

Responsibilities:

- Manage day to day development of multiple projects including scheduling, and change management.

- Front end development including XHTML/HTML5, CSS, Javascript and frameworks (Jquery, etc.)
- Develop and maintain custom, complex web applications using the LAMP stack.
- Work with customers to gather and understand project requirements.
- Design creative technical solutions using effective technologies according to customer needs.
- Recruit team members as required to support existing workloads.
- Identify, hire and manage third party vendors when required
- Manage and maintain code lifecycle process including version control and build methodologies.
- Identify, test and employ new technologies and solutions for customer projects.
- Select and recommend and administer company collaboration tools
- Create original graphic design, or work with a graphic designer to create UI from designers PSDs.
- Create effective UI/UX for customer projects

Some projects and what I did

<http://wearshare.us> - Design and configure hosting environment for production and dev, convert existing site to Code Igniter, expand/improve Open Graph integration, expand/improve client side scripting.

<http://www.equilibrium.com> - On this project I did all the development of 2 websites (Equilibrium and EQNetwork) working with a designer, who provided PSD source files, a project manager and an SEO expert.

<http://www.summitwireless.com> - Provided technical consulting on website lead generation, developed website using designers PSDs, created associated micro-sites for industry events, integration with MailChimp and Open Graph.

<http://www.emailmarketing.com> - This was a collection of Movable Type templates for the company blog.

<http://www.operationphoenix.com> - Constant Contact integration and email template production.

Chilin Display - On this project I did all the development of 2 websites (Equilibrium and EQNetwork) working with a designer, who provided PSD source files, a project manager and an SEO expert.

XML Challenge - An online quiz built using custom Drupal modules.

Attensa Inc

Maker of RSS Servers, RSS Readers and RSS plugins for platforms such as Lotus Notes, MS Exchange Server, SharePoint, Blackberry Enterprise Server, Domino, and others
